BOZEMAN WATCH COMPANY SLATES 1 DECEMBER PRICE INCREASE ON REMAINING SMOKEJUMPER CHRONOGRAPHS (Bozeman, Montana 11/1/2007)

December 1, 2007 will see an \$800 increase on the price of the Bozeman Watch Company's *SmokeJumper Chronograph*, a reflection of the dwindling stock of this iconic classic. The original timepiece of the "**Montana Class Watch Collection**" the *SmokeJumper* helped put Bozeman on the horology map, and remains the most popular of Bozeman's timepieces.

Limited to 100 individually-numbered pieces, the *SmokeJumper Chronograph* is the official timepiece of the Missoula, Montana-based National Smokejumper Association, and the BWC has returned thousands of dollars to these highflying firefighters in support of their mission. Recently the company announced plans to auction *SmokeJumper #80* for the victims of the recent firestorms in Southern California.

Retailing at US\$5,500 through November, the *SmokeJumper* will sell for US\$6,300 when the price change takes effect on the 1st of December.
